ℹ Intro

I'm a designer based in Mountain View, CA. I enjoy the design process end-to-end, from UX research, to mockups, user testing and producing pixel-precise mockups.

I am particulary interested in data visualization and using visuals to enhace and improve user experience, in a multi-device landscape. Also about the intersection of art and code, using D3.js & P5.js

On my free time, I enjoy doing vector illustration, reading about design, photography and traveling.

🖥 Skills

Illustrator	Photoshop	Sketch	After Effects

CSS3
HTML5
JavaScript
Android
Git/Github
D3.JS
